PROFILE

Software engineer and web developer with experience across web design, full-stack development, test automation, AR and IoT. Currently designing and building company websites and a Unity AR application at Pomar Engineering, after close to three years as a software developer at Thales DIS. Focused on responsive, well-crafted interfaces and reliable, well-tested software.

WORK EXPERIENCE

Software Engineer — Pomar Engineering

MAY 2025 – PRESENT

- Design and develop company websites for Luumens, Craftism, Voyagaer and Evnergy, from layout and visual design through to the live build.
- Build custom page sections as HTML/CSS/JavaScript widgets in WordPress (Elementor), using a shared design-token system for consistent typography, colour and spacing.
- Create scroll-driven animations and interactive components with GSAP/ScrollTrigger: hero transitions, tabbed product showcases, sliders and mega-menu navigation.
- Build responsive layouts for desktop, tablet and mobile, including product pages for marine engineering systems.
- Develop a Unity AR mobile application for marine equipment visualisation: AR object placement, place/move modes, tap-to-select machine parts and maintenance info panels, backed by a ScriptableObject data system; tested on Android with AR Foundation.

KEY TECHNOLOGIES: WORDPRESS, ELEMENTOR, HTML, CSS, JAVASCRIPT, GSAP, UNITY, C#, AR FOUNDATION, GIT

Software Developer — Thales DIS

AUG 2022 – APR 2025

- Automated card validation processes using Python, reducing manual testing time by about 10%.
- Optimised applet and OS loading scripts in VB.NET and Python, increasing deployment efficiency by 25%.
- Conducted comprehensive functional, regression and stress testing, identifying critical defects early and improving card release quality.
- Collaborated with R&D teams to create sample cards for further testing and certification.

KEY TECHNOLOGIES: .NET, VB.NET, PYTHON, AUTOMATION TOOLS, REGRESSION TESTING

Web Designer / Developer — Freelance

PRESENT

- Designed and built ganko.sg, a website for a high-end Japanese restaurant in Singapore, using GoDaddy Website Builder.
- Low-fi drafts in Figma, responsive web design, branding and visual design.

INTERNSHIPS

Full Stack Developer (Intern) — RunningStream Group

JUL 2021 – MAR 2022

— Developed responsive Angular financial web applications, reducing load time by 10-15%.

— Improved UI/UX using responsive design principles, increasing user engagement.

— Integrated REST APIs and backend services; contributed backend logic with Node.js and SQL to ensure data consistency.

KEY TECHNOLOGIES: ANGULAR, JAVASCRIPT, TYPESCRIPT, REST APIS, NODE.JS, SQL

IoT Developer (Intern) — TP Advanced Manufacturing Centre

APR 2021 – JUL 2021

— Created a real-time IoT dashboard with ThingWorx and Tableau to monitor SMT machine status.

— Applied predictive analysis via machine learning to reduce machine downtime by 10%.

— Programmed PLCs and integrated sensor data into the analytics pipeline.

— Demonstrated the IoT proof of concept to stakeholders including Singapore's Minister of Education.

KEY TECHNOLOGIES: THINGWORX, TABLEAU, PYTHON, SQL, PLC PROGRAMMING

PROJECTS

OpenAI-Powered Telegram Chatbot for Financial Training

2025

GPT-4 assistant simulating client conversations and exam scenarios for financial consultants, with subscriber access control and automated message and image handling.

KEY TECHNOLOGIES: OPENAI ASSISTANTS API, TELEGRAM BOT API, MAKE (INTEGROMAT), REST APIS, WEBHOOKS

Sports and Wellness Student Portal — Temasek Polytechnic

2020

Student enrolment platform built with Angular, Node.js and MongoDB.

ITAD Machine Learning Project

2020

Image classification and object detection concept presented to NParks, NEA and MSO; Python real-time image analysis with mobile alerts.

SKILLS

LANGUAGES	JavaScript, TypeScript, Python, Java, C#, HTML/CSS, SQL, VB.NET
FRAMEWORKS	Angular, React, Node.js, Django, Ionic, REST APIs
WEB	WordPress, Elementor, GSAP / ScrollTrigger, responsive design
AR / 3D	Unity, AR Foundation
DATABASES	SQL, MongoDB, Firebase
TESTING	Selenium, regression testing, stress testing, automation scripts
DESIGN	Figma, Adobe XD, Axure

EDUCATION

Diploma in Information Technology — Temasek Polytechnic

2019 – 2022

GPA 3.32 · FULL-STACK WEB AND MOBILE DEVELOPMENT · DATA ANALYTICS, DATA STRUCTURES AND ALGORITHMS · MACHINE LEARNING AND IOT

OTHER EXPERIENCE

Store Specialist — SandboxVR
2020 – 2022

Admin / Logistics — Shopee Warehouse
SEP 2020 – SEP 2021

LANGUAGES & REFERENCES

English, Burmese
